

Certificate of Completion

This is to certify that Youssef Shanan has completed 25 hours of community service. These hours were completed engaging in a neighborhood development project that aimed to beautify the neighborhood where the school is located. This student's participation in this project involved participating in brainstorming sessions, engaging in group work and holding group meetings, designing a project, and implementing that project. Projects included redecorating the school wall, building a new middle island in the street, planting new trees, raising funds for the project, raising awareness about their cause, and organizing and facilitating the logistical aspect of the project.

They have been exposed to a very new experience over the course of this project. They had to do a needs-assessment of the area surrounding the school, decide what needed to be done, divide the tasks among themselves, and start implementing these tasks in a manner that is both realistic and time efficient.

After participating in this project, this student has gained knowledge of what a community development project entails and a more rounded understanding of their own community and its needs.

Community Development Program

2015-2016

Community Development Teacher
Dalia El Serafy

High School Headmistress
Hala Tewfik
